

AZUR SOLAR RESIDENTIAL & COMMERCIAL SOLUTIONS FOR INSTALLER DEALERS

WORKING WITH AZUR SOLAR AS YOUR TRUSTED SUPPLIER

Azur Solar has been present in the UK since 2005. We are one of the most successful privately held multinational solar PV companies with operations in Europe, North America and Asia. We have recently concluded a substantial investment programme in the UK, strengthening our presence with a new headquarter and distribution center in Slough, in order to supply our proven products nationwide locally, reliably and timely.

OUR OFFERING TO INSTALLERS

We offer both All-in-one Kit solutions and components, depending upon your preference of supply. Our kits and components use our MCS accredited modules and rely on the same proven and trusted manufacturers, we have selected and worked with for a long time. Working with Azur Solar, you will use best German quality products at highly competitive prices – as a large market player, we can offer very favourable value-for-money.

AZUR SOLAR QUALITY MODULES AND COMPONENTS

Azur Solar modules and components will withstand the test of time and weather for more than 25 years. They are quality tested and have a positive only tolerance. A unique feature: Our optional Azur 2P coating provides additional protection and increases the efficiency and reduces the need for cleaning.

THE AZUR SOLAR POWER KIT SERIES

Azur Solar Power Kits are optimised for performance and specially designed for independent installers, who focus on selling and installing and prefer an all-in-one solution, but can also be ordered and distributed in bulk quantities. Contrary to what you might think, the sum of the parts is not only cost-efficient, but above all the kit saves precious time. A special feature is our POWER MOUNT box, which holds all necessary parts neatly arranged and ready for installation in one single box – very practical indeed.

How to benefit as an Azur Solar Partner

- Reliable supply, quality products
- Ongoing innovation – unique products
- Attractive prices, discount and loyalty schemes
- Invitation to work on Azur Solar XXL projects

Azur Solar also develops very large roof-top projects as a leading UK player. We regularly invite our partners to work with us on these large installations.

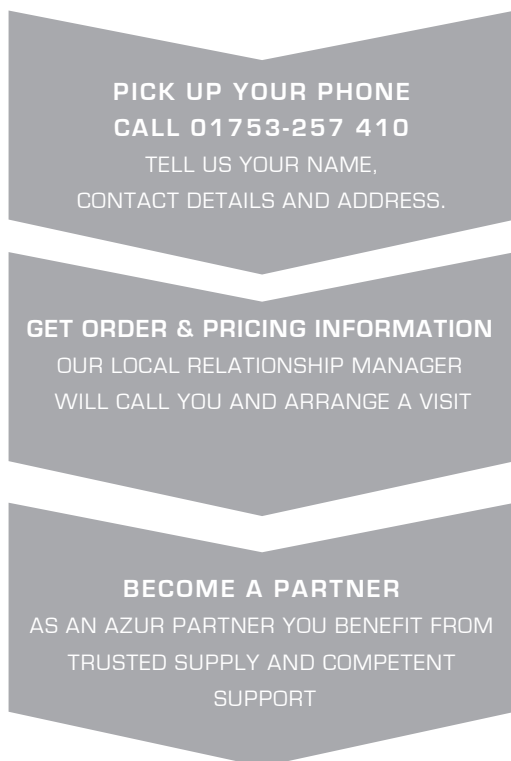

OUR PHILOSOPHY

We have developed our own “eco system“ of trustworthy and reliable engineers, installers, legal and financial experts. For large scale complex installations it is this network that counts and with our own in-house project engineers and key account managers we can ensure the consistent and timely delivery of Solar PV generation plants.

EXTRA VALUE: BECOME AN XXL-PROJECTS PARTNER

During recent years, Azur Solar has delivered from small to very large on-roof commercial projects to satisfied customers in Germany, Spain, Belgium and the USA. In addition we have a substantial development pipeline of Solar PV projects in the UK, Pakistan, India, France and other countries around the world. Benefit from a project-partnership with us in addition to product supply.

HOW TO BECOME AN AZUR SOLAR PARTNER:

ABOUT AZUR SOLAR

AZUR SOLAR is one of the most successful privately held multinational solar PV companies with German origin and has been present in the UK since 2005. From our new headquarter and distribution center in Slough, Berkshire, opened in Feb 2011, we supply AZUR SOLAR Power Kits as well as our full range of components nationwide to our installer, dealer and distributor partners.

We also develop, construct and operate large to very large industrial and commercial roof installations. As a turn-key EPC for such projects, we shall work in partnership with our qualified installation partners on a large number of occasions.

We combine German and international project and service experience, combined with dedication to quality and massive purchasing economics into a highly compelling offering. Please talk to us !
